Year 2 have had a great start to our new school year. For our first week of Year 2 we have been exploring all the new things around our classroom and catching up on exciting holiday news. We have also done a few assessments already! The most exciting thing we did this week was meet our class mealworms. We looked at the mealworms with a magnified glass and learnt about what they like to eat. Over the next few weeks we hope to see how they grow and if they will change.
